

Tutoring After~Teach

Program Name – Tutoring After - Teach

Description of Program

Today, students are being exposed to algebra concepts and formulas much earlier. As a result, many of them are failing their math classes . . . this causes a gap between what is their expected level of achievement and their actual performance. Parents can bridge this gap by getting themselves and their kids involved in Mathematics enrichment classes, and their supporting cast of subjects like Science and History.

Local churches will augment the in-class, in-school teaching experience by Tutoring After-Teach, an afternoon Mathematics enrichment program for grades 5-12. High quality, one-on-one tutoring in all levels of Mathematics, from Pre-Algebra to Calculus is also available. This program provides assistance in all levels of Mathematics and Science, as well as History and English. Qualified personnel teach concepts in small groups with enhanced one-on-one help as needed.

Benefits of program

Grades K-6

Monday-Friday from 3:00-5:30 p.m.

For grades K-6, the local church offers CARES After-School Program free of charge. The afternoon begins with snack and homework, with assistance provided by qualified teachers. Fun and active individual and group play then follows, with outdoor playtime encouraged whenever possible, but inside access provided during inclement weather. This service is particularly appreciated by working parents of children who are not yet old enough to be home alone at the end of the traditional school day.

Implementation

Grades K-6

Monday-Friday from 3:00-5:30 p.m.

For grades K-6, the local church offers CARES After-School Program free of charge. The afternoon begins with snack and homework, with assistance provided by qualified teachers. Fun and active

individual and group play then follows, with outdoor playtime encouraged whenever possible, but with inside access provided during inclement weather. This service is particularly appreciated by working parents of children who are not yet old enough to be home alone at the end of the traditional school day.

**Homework Assistance Program for Grades 6-12
Monday-Thursday from 3:00-5:00 p.m.**

Homework can be the bane of any parent's existence, especially for the parent of a child who learns differently. Some schools take the path of no homework, focusing on in-class work instead. While that may make for a quieter home life, it does not serve the college-bound student. With a goal to send students to college with the tools and strategies for success, we recognize the importance for students to learn successful study and homework strategies. Among others, the tutoring program that augments in-classroom learning is the Homework Assistance Program (HAP) free-of-charge to all students in grades 6-12.

Above and Beyond

For parents who want to go above and beyond what day school provides in the classroom and what is offered through afternoon programs, the local church will offer the "Above and Beyond" tutoring initiative. Expert teachers will be available for extra support in any subject area and for any grade. We encourage discussion with a student's teacher(s) and division head on academic needs and expectations. They can then help guide parents toward appropriate resources within the program and help monitor student progress both within tutoring and the classroom itself.

Local ministries have an opportunity to augment the in-classroom experience, For a world-class tutoring initiative after classroom teaching, contact COGIC Urban Initiatives Education.
