

Introducing the Wellvana Interfaith Network (WIN)

A Partnership in Service of Healthier Communities

The health disparities that exist within America's communities will not go away without dedicated effort. It is an urgent matter – one we are working to solve every single day – and that is why we are proud to announce WIN, a partnership between Wellvana and faith communities.

WIN advances health equity by elevating the healthcare experience and results for physicians and patients through Wellvana's high-touch, patient-first approach to value-based care. By partnering with Wellvana, physicians and their patients unlock dedicated support that can have a life-changing impact.

➤ A Helping Hand for Physicians

Our experienced team of operators will help a practice through every step of the value-based care transformation, taking on the upfront costs and providing resources to support doctors and their patients.

➤ Embedded in the Workflow

We embed with our partners and integrate our high-touch approach into their existing workflow. We're not selling software and sending a practice on its way. Life-changing healthcare happens when it's human to human.

➤ Foundational Care Management

Our Care Team will oversee a practice's most complex patients, working with clinician guidance to build personalized Care Plans that help Wellvana patients see 22% fewer hospitalizations.

➤ Clinical Documentation Accuracy

Our experienced Clinical Documentation Team stays in conversation with clinicians, helping practices accurately capture conditions for payors so that patients receive the appropriate level of care.

➤ Discharge Management

When a patient is discharged from the hospital or ER, our Care Team gets an alert and will call the patient within 24-48 business hours to schedule a follow-up appointment with their doctor, helping to avoid unnecessary (and costly) readmissions.
